Flo is explicitly inspired by the wonderful world of flowers, represented through iconic and friendly shapes. The entire collection features a light and elegant aluminum frame combined with the warmth of different colors and textures.

The dining and coffee tables come in full powder coated aluminium frames while the dining and lounge chairs display a tone-on-tone rope weaving that represents the typical color fading effect of the petals. The large daybed allows the unique experience of relaxing inside a Nymphaea, feeling the calmness of the water.

Scala

DESIGN
livintwist studio

The Scala collection is inspired by traditional Chinese design elements, from the gentle lines and flowing forms of traditional Chinese "Han Fu" dresses. The result is a graceful expression of traditional values, but delivered in a modern and elegant package.

The collection features a signature design chair with two overlapping arcs inspired by the sleeve design on traditional "Han Fu", united by vibrant rope weaving delivering luscious colours and rich textures. The accompanying tables adds a robust presence to the ensemble.

Manhattan

DESIGN

Claudio Bonicco, Andrea Lo Papa

Inspired by the iconic "histogram" skyline of New York City, the Manhattan collection embodies the energy and creativity of a modern metropolis.

Each piece is unique, assembled individually with its own distinct colour profile, configured to reflect the diversity of a vibrant city and its residents. The Manhattan collection is built on a 100% rust-resistant aluminium frame in matte powder coated finish.

The versatile construction also means it can scale from simple pieces for cosy corners to a full set for expansive outdoor landscapes. The collection is perfect for gardens, terraces and balconies, poolside areas, cafes and restaurants, anywhere you want to add a splash of fun and energy without compromising style and comfort.

DESIGN

The Miss collection explores the beauty of the void, where what's not there is as important as what is present.

The result is an original concept that merges physical elements with negative space, a breakthrough design that resembles an union of two conventional high-back chairs, merged into a mirror image. The showpiece chair is instantly recognisable and is perfectly paired with its accompanying table and coffee table.

Design for both fun and visual impact, the Miss collection is also uncompromising for its comfort and durability, consisting of a simple white-coated aluminium frame supporting elegant woven surfaces of two-tone elastic roping.

SPACE

Design by
Frank Chou

Futuristic art design

Flowing lines create a dynamic effect. Create a sense of infinite extension of space, showing the fluidity of space.

Under the irradiation of light, the effect of light and shadow is played to the extreme, and the dynamic tension is injected into the simplicity. The architectural structure is integrated into the artistic design and a new breakthrough is achieved.

The direction of the line is free-spirited, and the sense of the future is conveyed through the splicing of different materials.

**Experience
the
Ultimate
Enjoyment**

Inspired by the natural and unrestrained vitality of Flying Apsaras in Dunhuang Grottoes, Apsaras Collection is characterized by an iconic profile that evokes artistic rejuvenation of valuable ancient culture.

Woven with skilled craftsmanship, it draws a sinuous yet stable structure that exudes dynamic beauty in oriental poetic language and thus creates a wonderful spatial experience for people at leisure.
